

The journal publishes results of basic and applied research from food chemistry, food technology, food engineering, food economics, and human nutrition. Original papers, short communications and reviews are accepted. Papers are published in English. The author is fully responsible for the originality of the paper and formal correctness. The paper must not be published previously elsewhere. The Board of Editors decides on the publication of papers, taking into account peer reviews, scientific importance, and manuscript quality. All contributions are reviewed using the criteria of originality, quality, and length with regard to the content of new scientific information. Papers suitable for consideration will be sent to at least two referees.

The SI international system of measurement units should be used. Two complete copies of manuscripts must be submitted. Manuscripts must be submitted in English (a language revision will be provided free of charge if necessary). A properly labelled floppy disk with identical contents, including figures should be enclosed. Alternatively, the manuscript can be sent by e-mail as attachment.

Copyright. The journal is protected by copyright held by the publisher after the manuscript has been accepted for publication. As concerns the transfer of rights, the corresponding author takes over responsibility for all authors. No part of this publication may be reproduced, stored, or transmitted in any form or by any means, without the written permission of the publisher.

Manuscript layout. Standard size of paper (A4 format), type size 12 font, double-space lines, 2.5cm margins on each edge of the page. MS Word (version of Word used must be specified) should be used. Tables, graphs, and other material are to be submitted separately to the text. Each document should be printed, commencing on a separate sheet of paper, and its title and detailed description including the measurement units used should be indicated. Word editor should be used to create tables, for tables each item should be placed into a separate cell. Tables are to be numbered with Arabic numerals in the order in which they are referred to in the text. Graphs should be provided in Excel and they should be stored with original data. Autotypes (black and white ones are preferred) should be submitted in TIF or JPGE format. All graphs and photos should be numbered, continually according to the order in which they are included in the text, again using Arabic numerals. All other material should be submitted in digital form, in high resolution black and white format. Colored photos or maps can be published in printed version at the authors' cost. However, colored documents submitted are published free of charge in pdf format of papers available at the journal web page. All material to be included in a paper should be referred to in the text. If any abbreviations are used in a paper, they shall be explained appropriately when they are used in the text for the first time. It is not advisable to use any abbreviations in the paper title or in the abstract.

Title page must contain title of paper (short, not exceeding 85 characters; no subtitles shall be used), complete name(s) of the author(s), the name(s) and address(es) of the institution(s) where the work was done.

Abstract is a short summary of the whole paper. It should describe all essential facts of a scientific paper. Keywords must be included. The abstract should not go to more than 170 words. The abstract is an important part of the paper because it is published and cited in world databases..

Introduction should outline the main reasons why the research was conducted, describe a brief review of literature consisting of refereed periodicals, journals and books, and the goal of the authors. It is recommended to include references to papers from peer reviewed periodicals only. Citations from non-available sources (reports, proceedings etc.) should be omitted.

Material and Methods. All preliminary material, experiments conducted, their extent, conditions and course should be described in detail in this section. All original procedures that were used for the processing of experimental material and all analytical methods used for evaluation should also be detailed. Data verifying the quality of acquired data should be indicated for the used methods. The whole methodology is only to be described if it is an original one, in other cases it is sufficient to cite the author of the method and to mention any particular differences. Methods of statistical processing including the software used should also be listed in this section.

Results and Discussion. The results obtained from the experiments including their statistical evaluation and any commentary should be presented graphically or in tables in this section. The author should confront partial results with data published by other authors, whose names and year of publication are to be cited by including them in the text directly e.g. ... as published by PAWLISZYN (1997), CHEETHAM and TAO (2001) found ..., or citing authors and years of publication in parenthesis (PAWLISZYN 1997; CHEETHAM & TAO 2000; JIN *et al.* 2001).

References should be a list of refereed periodicals arranged in alphabetical order according to the surname of the first authors. The full title of all authors should be followed by the year of publication cited in brackets, the original title of the paper, the name of the periodical, the relevant volume and page number, in the case of a book or proceedings the title should be followed by the name of the publisher and the place of publication. Literary sources should be cited in the original language. Only papers cited in the text should be included in the list of references.

Examples of references in the list:

SURH Y.J. (1999): Molecular mechanisms of chemopreventive effects of selected dietary and medicinal phenolic substances. *Mutation Research/DNA Repair*, **428**: 305–327.

CHEETHAM N.W.H., TAO L. (1998): Solid state NMR studies on the structural and conformational properties of natural maize starches. *Carbohydrate Polymers*, **36**: 285–292.

JIN Q., ZHANG Z., LUO R., LI J. (2001): Survey of 3-mono-chloropropane-1,2-diol in soy sauce and similar products. *Journal of Hygiene Research*, **30**: 60–61.

Papers published in monographs or proceedings should be cited like this:

PAWLISZYN J. (1997): *Solid Phase Microextraction, Theory and Practice*. Willey-VCH, New York: 31–41.

Contact address should include the postal address, telephone and fax numbers, and e-mail of the corresponding author.

Offprints: Every author whose e-mail address is published will receive a **free “electronic reprint”** in Portable Document Format (pdf) sent via e-mail as an attachment.

Compliance with these instructions is obligatory for all authors. If a manuscript does not comply exactly with the above requirements, the Editorial Office will not accept it for a consideration and will return it to the authors without reviewing.
