Genome-wide Association Study for Anther Length in Some Elite Bread Wheat Germplasm

XIAOPENG SONG, JIE FENG, ZIXIA CUI, CHUANLIANG ZHANG and DAOJIE SUN

College of Agronomy, Northwest A&F University, Yangling, Shaanxi, P.R. China

Electronic Supplementary Material (ESM)

Figure S1. The anther length from some varieties at YL during the growing season (2014–2015)
The name of accessions from left to right: Nongda 211, Jing 411, Zhoumai 19, Jimai 20, Zhoumai 28, Zhenmai 16, Ke-chengmai 1, Lumai 11, Chuanmai 41

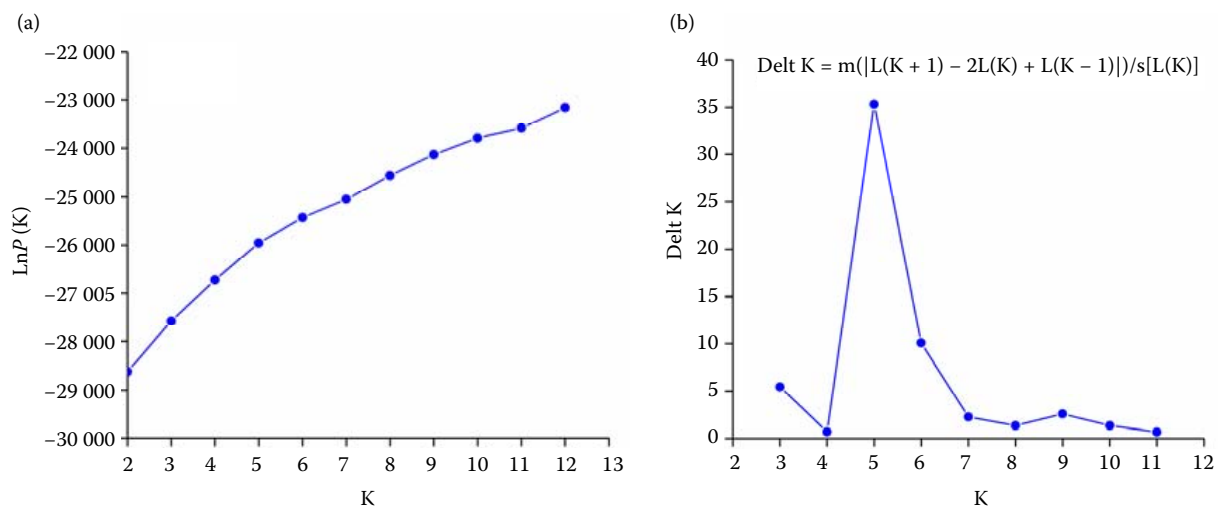

Figure S2. STRUCTURE estimation of the mapping panel: (a) evolution of the natural logarithm probability of the data against K; (b) magnitude of Delt K for each K value
