Editorial Board of Czech Journal of Genetics and Plant Breeding

Editor-in-Chief

Václav Šíp, Crop Research Institute, Prague, Czech Republic
Plant breeding methodology, cereal genetics/breeding, disease resistance

Co-Editors

Miroslav Griga, AGRITEC, Ltd., Šumperk-Temenice, Czech Republic
Plant biotechnology, molecular breeding, legumes and industrial crops

Erik Schwarzbach, Miroslav, Czech Republic
Analysis of cultivar trials and trial series, plant breeding methodology, genetics of disease resistance

Executive Editor

Ing. Markéta Knížková, Czech Academy of Agricultural Sciences, Prague, Czech Republic

International Editorial Board

Gérard Branlard, INRA Clermont-Ferrand – Theix, Clermont-Ferrand, France
Genetics and biochemistry of wheat quality, protein markers, proteomics

Bohumír Cagaš, OSEVA PRO s.r.o., Zubří, Czech Republic
Plant pathology, plant breeding, plant genetic resources, grasses

Petr Dědič, Potato Research Institute, Havlíčkův Brod, Czech Republic
Potato genetics and breeding, phytopathology, biological and molecular characterization of viruses

Ladislav Dotlačil, Crop Research Institute, Prague, Czech Republic
Genetic diversity analysis, plant genetic resources, agro-biodiversity

Antonín Dreiseitl, Agrotest fyto, Ltd., Kroměříž, Czech Republic
Plant pathology, genetic resources, disease resistance, genetics and breeding

Jan Dvorak, University of California, Davis, USA
Plant genomics, plant cytogenetics, genetic diversity of crops

Jaroslava Ehrenbergerová, Mendel University in Brno, Brno, Czech Republic
Cereal breeding methodology, food quality and safety of cereals, genotype by environment interaction

Gerhard Fischbeck, Technische Universität München, Freising-Weihenstephan, Germany
Plant breeding methods, marker-assisted selection, response to agricultural systems, plant nutrition

Wolfgang Friedt, Institute of Crop Science & Plant Breeding, Giessen, Germany
Oilseed crops genetics and breeding, genetic diversity and inheritance, QTL/linkage mapping, pyramiding resistance genes

Jiří Hartmann, Central Institute for Supervising and Testing in Agriculture, Brno, Czech Republic
Quantitative genetics, variety testing, agricultural field trials, trial series, application of biometrical methods
Pavel Horčička, SELGEN, a.s., Plant Breeding Station Stupice, Stupice, Czech Republic
Cereal and legume breeding, grain quality, resistance to stresses

Ahmed Jahoor, Nordic Seed, Dannemare, Denmark
Molecular methods, marker assisted selection, genetics of resistance, mapping resistance genes

Ján Kraic, Research Institute of Plant Production, Piešťany, Slovak Republic
Molecular breeding, genomics, biodiversity studies, genetic modifications

Ákos Mesterházy, Cereal Research Institute, Szeged, Hungary
Cereal resistance to diseases and pests, plant protection, breeding methods

Jaroslava Ovesná, Crop Research Institute, Prague, Czech Republic
Food safety, molecular genetics and breeding, DNA markers, structural/functional genomics

Josef Patzak, Hop Research Institute Co., Ltd., Žatec, Czech Republic
Molecular biology and genetics, plant breeding, plant tissue culture and transformation, molecular pathology

Hans-Peter Piepho, University of Hohenheim, Stuttgart, Germany
Biometrical genetics, bioinformatics, marker analysis, series of field trials, genotype-by-environment interaction

Ilja Tom Prášil, Crop Research Institute, Prague, Czech Republic
Plant genetics and physiology, proteomics, breeding for resistance to abiotic stresses

Jana Řepková, Masaryk University, Brno, Czech Republic
Plant genetics, cytogenetics, DNA markers, genetic mapping

Peter Ruckenbauer, University of Natural Resources and Applied Life Sciences, Vienna, Austria
Breeding agricultural crops, food safety of cereals, stability of quality traits, genotype by environment interaction

Petr Smykal, AGRITEC, Ltd., Šumperk-Temenice, Czech Republic
Legume genetics, genomics and molecular phylogeny; plant domestication; genetic diversity analysis and exploitation; molecular plant breeding; introgression

John W. Snape, Department of Crop Genetics, Norwich, United Kingdom
Crop genetics, genomics, mapping, QTL analysis, crop transformation and its applications

Mike Taylor, Zuchtstation Limagrain-Nickerson, Peine-Rosenthal, Germany
Wheat breeding, quality and disease resistance

Martin Užík, Research Institute of Plant Production, Piešťany, Slovak Republic
Plant breeding methodology, cereal and forage crops breeding, biometrical genetics, analysis of quantitative traits, nitrogen utilization
